

Neuromodulators

Aftercare Instructions

Today you have had injections of a neuromodulator (e.g. Dysport®, BOTOX Cosmetic®, XEOMIN®).

Neuromodulator is injected to relax facial muscles to treat and prevent fine lines and wrinkles and will work its way into the treated areas.

You will begin to feel and see some changes in approximately 2-3 days. The full treatment effect is **two weeks** from today's treatment.

The Healing Process

- Possible effects after your treatment include: swelling, bruising, pain, redness, discolouration, itching and/or tenderness at the injection site(s).
- These side effects may last for a couple hours - bruising can last several days after your treatment.
- On rare occasions these side effects may last for 2-3 days post treatment.
- You may take Tylenol if allowed by your family doctor.

For 3 Hours:

- Remain upright - do not lie down.
- Do not rub or massage the areas that have been treated

For the remainder of today:

- Avoid wearing makeup over the injection sites for the remainder of the day. If absolutely necessary you may apply make-up after 6 hours post treatment using gentle pressure.

For 24 Hours:

- Refrain from strenuous physical activity
- Do not apply pressure to the treated area (e.g. massage)
- Avoid high temperatures (e.g. hot tub, sauna)
- Do not have any facial treatments

Support

For any question or concern, please call your aesthetic service provider at 431-388-8869.

In case of emergency such as severe allergic reaction, please proceed to the nearest urgent care or emergency room.
