

# Neuromodulators

## Pre-Appointment Instructions

You are scheduled to have injections of a neuromodulator (e.g. Dysport®, BOTOX Cosmetic®, XEOMIN®).

Neuromodulator is injected to relax facial muscles to treat and prevent fine lines and wrinkles and will work its way into the treated areas.

### Prepare for Your Appointment

#### **2-3 days before your appointment (to minimize bruising):**

- Unless medically required, please refrain from using blood thinners
- Avoid consuming alcohol
- Avoid Vitamin E and Fish Oils

#### **The day of your appointment:**

- Do not wear make-up
- Gently wash your face
- Avoid using skin care products (moisturizer, retinol, etc.)
- Advise us if you are experiencing any redness, itching, swelling or infection.
